LinkedIn | GitHub

Summary

Second-year Computer Science Engineering student specializing in Data Science, with skills in Python, C++, JavaScript, SQL, React, and Node.js. Interested in backend development and generative AI, with hands-on experience building web applications and integrating the Gemini API. Seeking a software development internship to apply these skills to practical projects.

Technical Skills

Web Development: HTML, CSS, Tailwind CSS
Languages: Python, C++, JavaScript, SQL
Web Technologies: React, Node.js, Express, FastAPI, Vite, JWT Authentication
Databases: SQLite, MongoDB, Supabase
AI: Generative AI, LLMs, RAG, Gemini API
Tools and Platforms: Claude, Git, GitHub, Vercel, Hugging Face, Render

Projects

SmartSpend AI | *AI-Assisted Backend Development*
Tech Stack: React, Vite, Python, FastAPI, SQLite, Supabase, JWT Authentication, Gemini API
Live Application | GitHub Repository

- Developed backend features using Python, FastAPI, and SQLite with Claude-assisted coding, integrating the Gemini API for the AI financial coach, Coco.
- Built transaction logging and dashboard spending insights, with expenses logged through the Coco chat appearing on the dashboard.
- Implemented personalized, multi-turn financial guidance based on transaction data, with chat history retained after a page refresh.
- Implemented user authentication with JWT to verify users, storing user credentials in Supabase.
- Added a voice input button using browser speech recognition so users can speak to the Coco chat.

MediFlow AI | *Healthcare Web Application*
Tech Stack: React, Tailwind CSS, Node.js, Express, MongoDB, Gemini API
Live Application | GitHub Repository

- Created a patient portal with signup, login, appointment booking, and medical record uploads.
- Implemented JWT authentication to secure access to protected patient features.
- Integrated a Gemini-powered AI triage chat to help patients describe symptoms and receive initial guidance.
- Built separate patient, doctor, and administrator portals, with doctor registrations requiring administrator approval before booking eligibility.
- Implemented appointment booking, rescheduling, and cancellation workflows, with doctor profiles and available slots stored in the database.

Education

Chaitanya Deemed to be University (CDU) 2025-2029 (Expected)
B.Tech in Computer Science Engineering (Data Science) - Second Year *NIAT*
Semester 1 SGPA: 9.8 | Semester 2 SGPA: 9.3

Narayana Junior College - Class 12 2023-2025
Percentage: 93.6%

Maharishi Vidya Mandir - Class 10 2022-2023
Percentage: 75%

Hackathon Participation

Adobe University Hackathon - Participant August 2026
Build to Ship Hackathon 2026 - Participant August 2026
Takeover Hackathon - Participant July 2026
